

Manuel Díaz Regueiro

Math Teacher, Head of Centro de Formación e Recursos de Lugo

"I call my art 'Galician Mosaics'. It's a very particular and special kind of two dimensional l-systems, created with my own programs. It actually forms a set of 20,000 drawings."

“Granada”

2007, Digital print, 21 cm x 30 cm

The definition is like another l-system. In this case the lighting makes the result look like an Arabic mosaic.

“Alianza de civilizaciones (Alliance of Civilizations)”

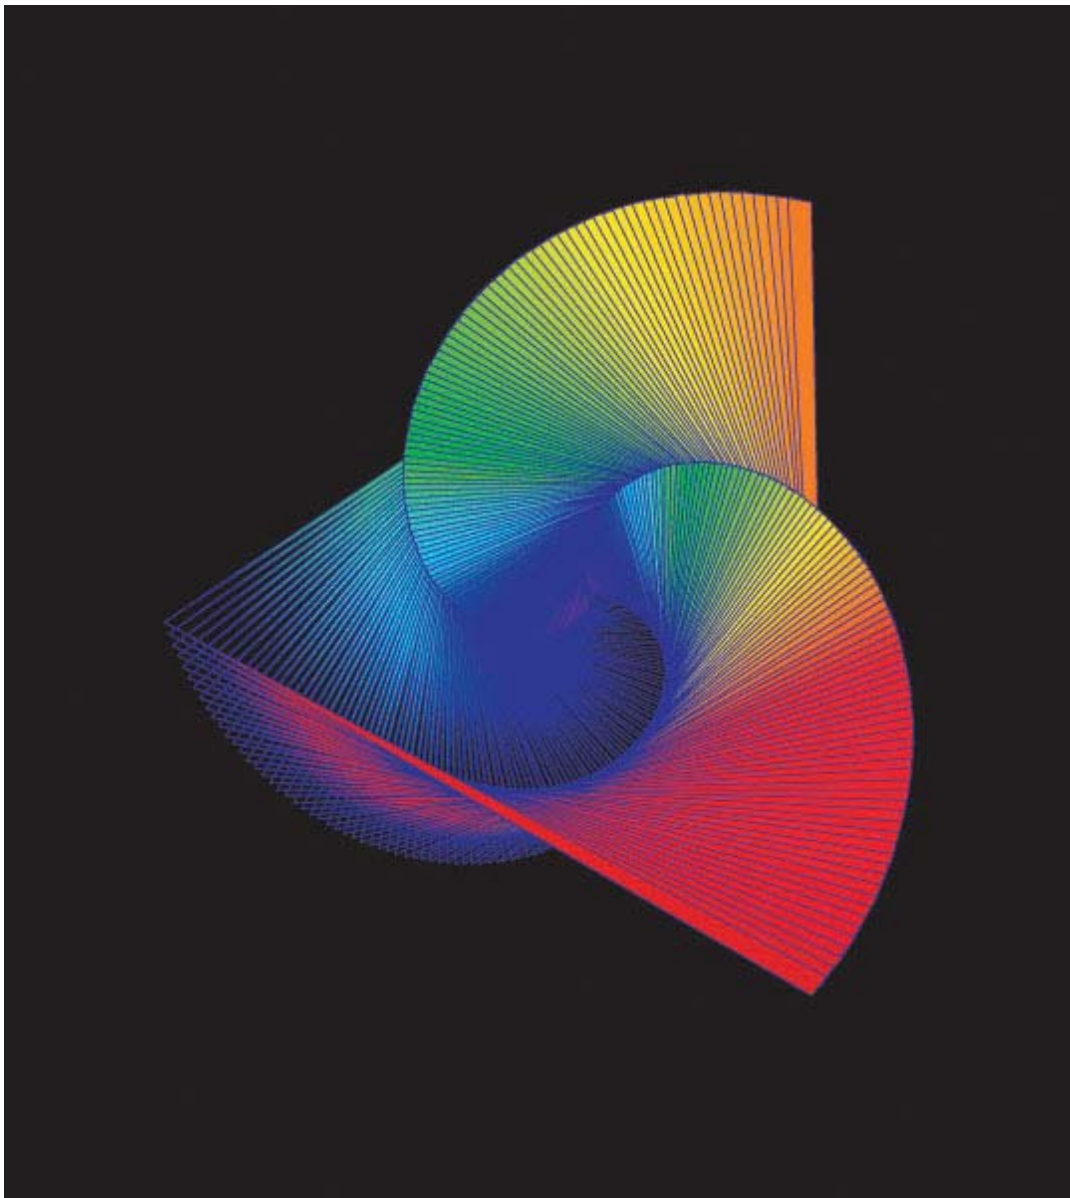

2007, Digital print, 21 cm x 30 cm

Like an Escher image that looks for the non-Euclidian geometry in a Galician mosaic with a Christian and Moorish mixture.

“ Triskel ”

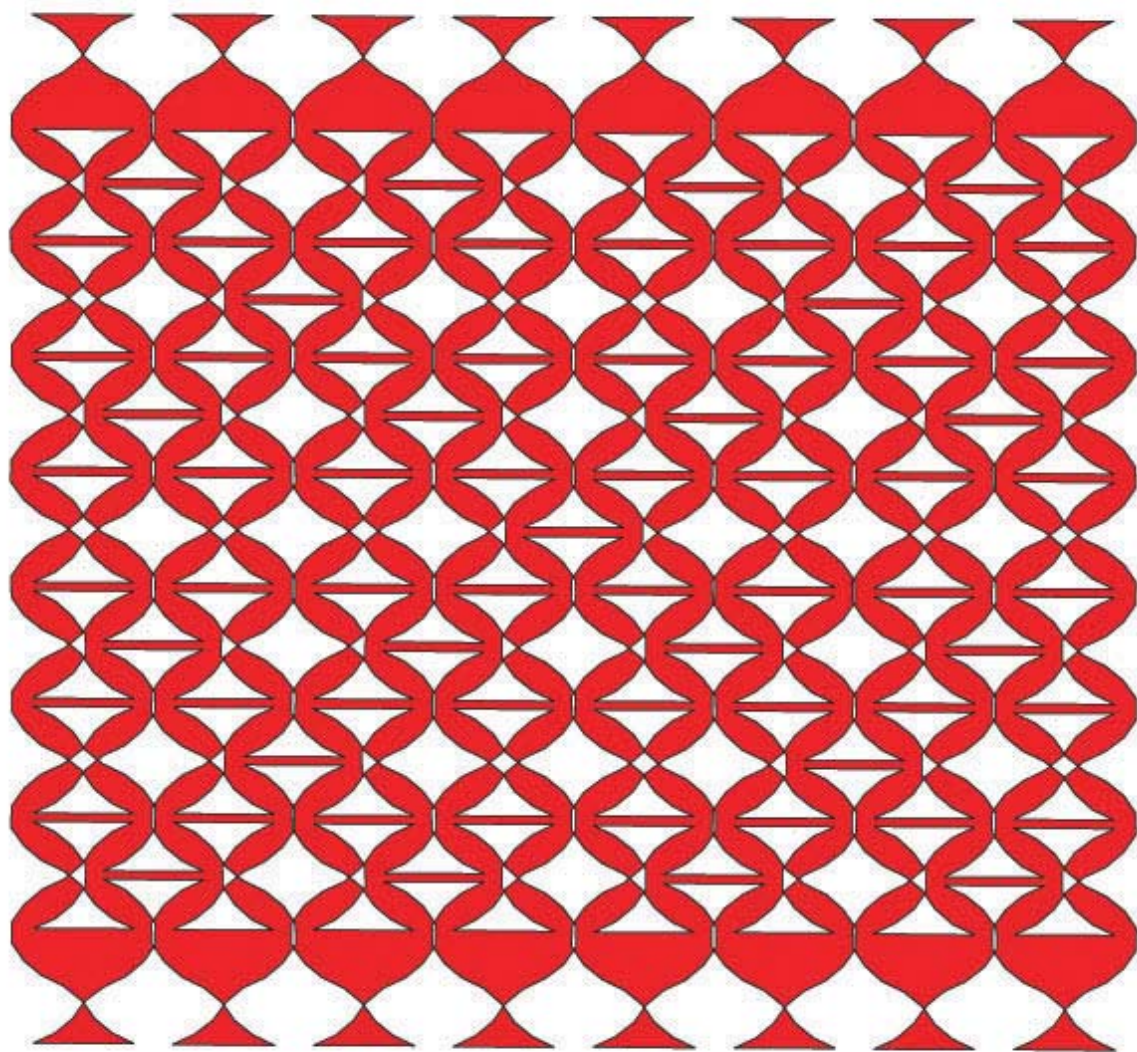

2007, Digital print, 21 cm x 30 cm

Triskel is an ancient Galician Celtic symbol. The drawing uses diverse spirals to symbolize the boat of the America's emigration.

“ Egypt ”

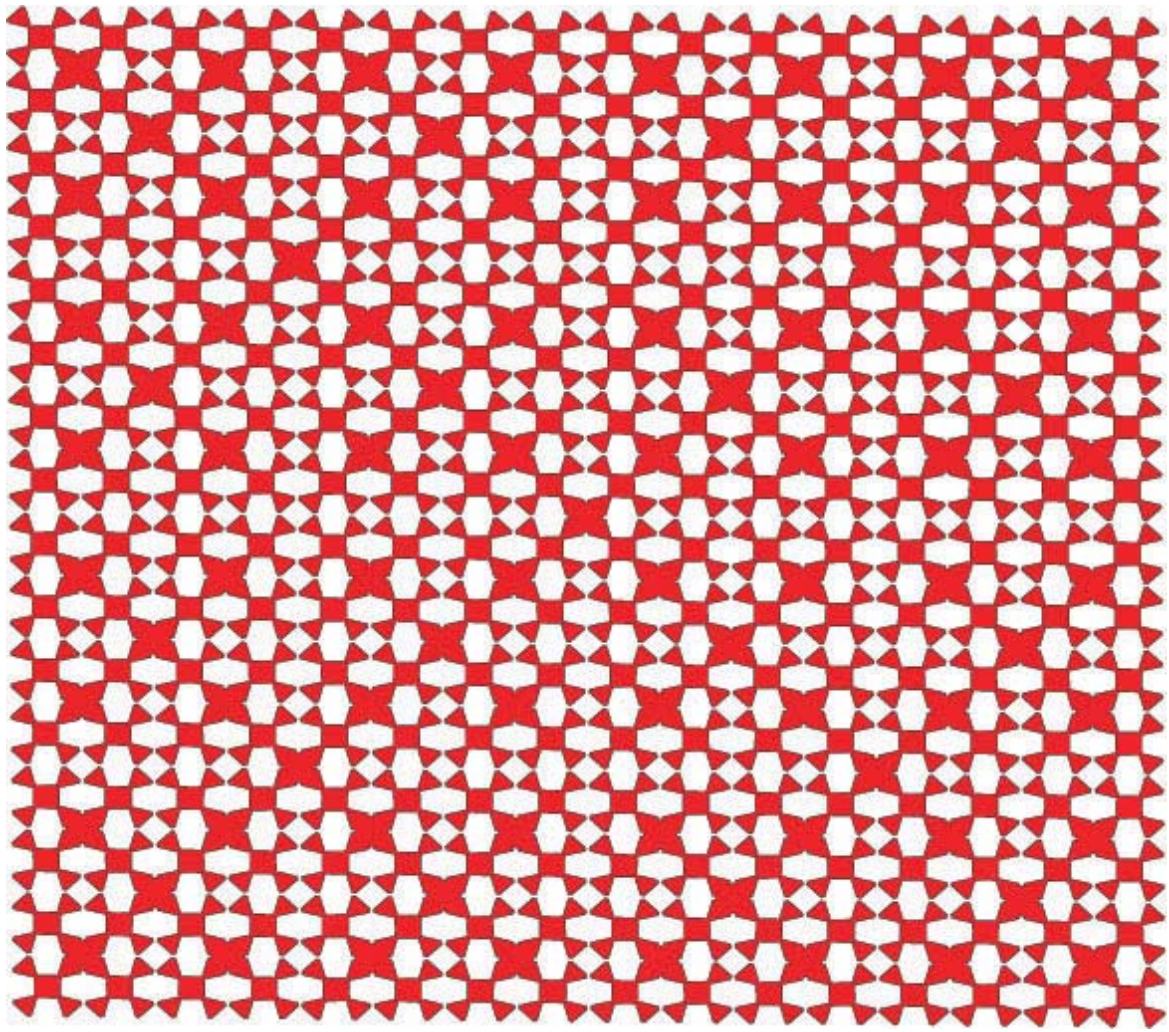

2007, Digital print, 21 cm x 30 cm

Another Galician mosaic. The definition is like another 1-system.

“ Octagon ”

2007, Digital print, 21 cm x 30 cm

Another Galician mosaic. The definition is like another 1-system.
